IDENTIFIERS	New York; *State University of New York; SUNY

ABSTRACT

A total of 27,745 transfer students were enrolled in fall 1974 at institutions in the State University of New York (SUNY). This represents an increase of 9.6 percent over fall 1973, and maintains the continuous growth of transfer students entering SUNY institutions. Of these students, 63.5 percent were enrolled in senior institutions and 36.5 percent in two-year colleges, a distribution similar to that of fall 1973. The majority of transfer students originated from within the SUNY system (59.7 percent), representing a slight increase over fall 1973. The most common type of transfer (34.9 percent) was the student who transferred from a two-year institution in the SUNY system to a four-year SUNY institution. The second most common type of transfer (18.4 percent) was the student who transferred from outside the SUNY system to a SUNY senior institution. The third most common type (17.3 percent) was the student who transferred from a non-SUNY institution to a SUNY two-year institution. This document presents 99 tables of data which organize information on transfers in the SUNY system as a whole, and in individual SUNY institutions. (Author/NHM)

LIST OF PUBLICATIONS 221

PREFACE

This is the fifth annual study of the application and enrollment patterns of University transfer students to be published by the Central Staff Office of Institutional Research. The study was conducted in response to the many requests for information regarding the inter-campus mobility of students attending institutions under the program of the State University of New York.

Because of the importance of reliable information regarding transfer students for regional and system-wide planning, and inter-institutional cooperation, the data gathered for this study have been organized and presented in a variety of formats designed to provide immediate answers to a wide range of questions which may be formulated regarding transfer students. The basic data are presented so as to directly relate the transfer student's prior institution and current SUNY institution and entry level. This information is provided for individual institutions, institution types, and institutions by coordinating area. Additional information is provided regarding trends in transfer students, relationship of the associate degree to transfers, admissions success of transfer students and other related information.

The acquisition of the data contained in this study involved a good deal of work on the part of the individual institutions. We appreciate the cooperation and effort that went into providing these data. We would particularly like to thank our professional, statistical and typing staffs whose efforts made this report possible.

Institutional Research

INTRODUCTION

Transfer students defined

Because of the conventional use of the term 'transfer students' and because different sources of transfer data may exist, the definition of transfer students used for this study is of special importance. Transfer students are "those undergraduate students who were enrolled at a given State University institution for the first time in the Fall 1974 term, but who had attended other colleges or universities prior to Fall 1974". With this definition, we have transfer students moving from two-year to other two-year colleges, from senior to other senior institutions, from senior institutions to two-year colleges, as well as from two-year to senior institutions. Even if no credits were transferable, albeit an uncommon case, the student moving from one institution to another would be a transfer student.

Students coming from business schools would be considered first-time students rather than transfer students. Students who simply change majors at the same institution are not considered transfer students in this study. Graduate students transferring from other graduate programs are not included here. Therefore, the New York State College of Veterinary Medicine and the State College of Optometry, which offer only graduate programs, are not included in this report.

The number of transfer students reported here is an understatement because of the difficulty some institutions have in obtaining background information on those students who are not admitted to specific degree programs by application. For example, there are 1,297 (4.7 percent) transfer students whose prior higher education history is unknown. There are undoubtedly many others who are not even known to be transfer students, but these are not likely to be seeking upper division status.

Design of the study

Transfer student studies can be designed to follow identified students longitudinally, observing their success patterns. The investment of effort and time required for such studies would be substantial, given the size and complexity of the State University of New York. For this reason, a different approach was used in this study.

The paradigm used here was the analysis of the higher education backgrounds of transfer students enrolled in the various levels of the institutions under the program of the State University of New York. Some types of conclusions cannot flow from such a study; e.g., students who were unsuccessful in obtaining transfer acceptances anywhere in these institutions are not included even though they were formerly enrolled at one of the institutions included and may have graduated in University-parallel programs. Therefore, this study is based on an input model, not a true follow-up model.

Differences between this study and data from the Admissions Processing Center

The data from the Central Staff Admissions Processing Center (A.P.C.) does not correspond with the data of this study. The major difference is in the populations surveyed. Several institutions under the program of the State University of New York do not participate with the A.P.C. and consequently the data collected by A.P.C. is not system-wide. This report, however, includes system-wide data for all undergraduate institutions under the program of the State University of New York. The census date for the collection of data also differs. The data included in this study shows enrolled students at a specific time after classes have started and enrollments have stabilized.

Regional statistics

The articulation of transfer students is an important consideration in regional planning and cooperation among the institutions of the State University. This report includes an index of State University institutions by coordinating area. In addition, data on the educational background and placement of transfer students, undergraduate admissions and enrollment data are provided by coordinating area.

SUMMARY OF DATA

General Findings

A total of 27,745 transfer students were enrolled in the Fall of 1974 at State University institutions. This represents an increase of 9.6 percent over Fall 1973, and maintained the continuous growth of transfer students entering State University institutions. Of the 27,745 transfer students, 63.5 percent were enrolled in senior institutions and 36.5 percent in two-year colleges, a distribution similar to that of Fall 1973.

The majority of transfer students originated from within the State University system (59.7 percent), which represents a slight increase over Fall 1973 (58 percent). The most common type of transfer (34.1 percent) was the student who transferred within the State University system from a two-year to a senior institution. A full 85 percent of those were transfers from Community Colleges. The second most common type of transfer (18.4 percent) was the student who transferred from outside the State University to a SUNY senior institution. This is the second successive year in which this group was the second most common type, reversing a trend of the previous three years when the second most common type of transfer was the student who transferred to a two-year college from outside the State University system. The third most common type of transfer (17.3 percent) was the student who transferred from a non-SUNY institution to a SUNY two-year institution.

A brief summary of selected aspects of transfer student mobility expressed as percentages of all transfer students follows:

From a SUNY institution	59.7%
From a non-SUNY institution	35.6%
Previous institution unknown	4.7%
	100.0%

From all sources to a SUNY senior institution		63.5%
From a SUNY two-year institution	34.1%	
From a non-SUNY institution	18.4%	
From a SUNY senior institution	10.1%	
Previous institution unknown	0.9%	
From all sources to a SUNY two-year institution		36.5%
From a non-SUNY institution	17.3%	
From a SUNY two-year institution	10.9%	
From a SUNY senior institution	4.5%	
Previous institution unknown	3.8%	
		100.0%

Transfers to Senior Institutions

One measure of transfer student populations is the proportion of students accepted with full junior or senior standing. Students transferring from State University institutions seem to show smoother articulation than students from institutions outside the State University system, whether inside or outside New York State. For example, 59 percent of the transfer students from State University institutions admitted to senior institutions entered at the junior or senior class level. Only 37 percent of those from institutions outside the State University system entered at the junior or senior class level.

In addition to preparing students for smooth articulation to the third and fourth years of bachelor's degree programs, it is also notable that SUNY two-year colleges produced 53.9 percent of all transfers to SUNY senior institutions. The largest group of such transfers was from Community Colleges (46.0 percent). Community Colleges under the sponsorship of the New York City Board of Higher Education produced 1.3 percent while all other community colleges produced 44.7 percent. The Agricultural and Technical Colleges produced 7.9 percent of all transfers to SUNY senior institutions.

In this regard, it is interesting to note that transfers to senior institutions were produced in similar percentages by the other sources as well (see Table 4) i.e., the percent of transfers to a senior institution from a SUNY senior institution was 15.9 percent; from a non-SUNY institution with New York State, 15.0 percent; and from out of state, 14.0 percent.

Significant changes in transfer student data, Fall 1973 to Fall 1974

The total transfer population increased from 25,310 in Fall 1973 to 27,745 in Fall 1974. Those in the category of "prior institution unknown" increased from 410 (1.6 percent) in Fall 1973 to 1,297 (4.7 percent) in Fall 1974.

The role of the Community Colleges under the program of the State University of New York is ever increasing. Table 5 depicts the yield of transfers per associate degree. Overall, the yield has increased from .1690 in Fall 1973 to .1834 in Fall 1974.

The most dramatic increase is in the category of "Other Community Colleges", those with A.A. or A.S. degrees, where the yield increased from .3983 to .4357 (or from 3,816 to 4,167 transfer students).

It has been obvious over the years that the number of transfer students from Community Colleges under the sponsorship of the New York City Board of Higher Education to other SUNY institutions has been very low. This study of Fall 1974 transfer students is the last such study to include data concerning these New York City Community Colleges, as legislation was signed to make those colleges an integral part of the City University of New York effective July 1, 1975.

Concluding remarks

A study of this complexity will undoubtedly raise further question to more insight about the extent and nature of student mobility to an the State University of New York. It is hoped that the basic informa be useful and that on the basis of these and other data, more student ways to further their search for appropriate and rewarding educationa ences.

[a]Excluding community colleges sponsored by the New York City Board of Higher Education. Under the Open Admission policy, students were not permitted to apply to a particular two-year or senior college under the sponsorship of the New York City Board of Higher Education. Therefore, the "applications" columns were not available campus-by-campus nor for the community colleges in the aggregate.

[b]Includes Buffalo Health Sciences Center.

[a]Excluding community colleges sponsored by the New York City Board of Higher Education. Under the Open Admission policy, students were not permitted to apply to a particular two-year or senior college under the sponsorship of the New York City Board of Higher Education. Therefore, the "applications" columns were not available campus-by-campus nor for the community colleges in the aggregate.
